THE TRUTH ABOUT OLIVE OIL

Spout arrangement fully patented

Canned at the place of production in Italy

There are a number of "Pure" Olive Oils on the market to-day. All the pure olive oils, however, are not First Quality olive oils! Simply to know that you are buying an olive oil marked "pure" is not enough. The fact that an olive oil is pure does not necessarily imply that it is fit for human consumption. There are several different grades of olive oils, regardless of their purity. There is but one grade of olive oil that should ever be used for table use or for medicinal purposes; that is the first pressing of hand picked, carefully selected olives.

When you buy a can of OLIVESE you secure the HIGHEST GRADE Olive Oil that can be had at any price.

"ALL THAT THE LABEL IMPLIES IS IN THE CAN"

DELIA IN AGAIN.

For the "steenth" time in the last few weeks, Delia Winters was again placed behind the bars of the city jail Monday night. As usual, Delia had been imbibing too freely of the spirits that intoxicate and was expressing her

opinion of her neighbors in no unimpeachable terms. She was released this afternoon.

WASTE

Of Minerals in United States
is Estimated to Be at Least
\$1,000,000 a Day.

(SPECIAL TO THE TELEGRAM)
WASHINGTON, D. C., Mar. 31—A million dollars a day is the estimate of the bureau of mines of the loss in the United States by the waste of minerals. It may be more, according to the same authority. What is wasted in each state is not given in the annual report of the chief of the Bureau of Mines, but as West Virginia is second in mineral production among the states of the Union, and has taken no more advanced steps than other states to prevent the waste of its minerals, it is apparent that the waste in that state is very large. The waste in the oil and gas fields of the country is placed by the director of the Bureau of Mines at more than \$5,000,000 a year, which, however, from \$15,000,000 to \$20,000,000 is credited to Oklahoma. The waste in coal mining is estimated at more than \$50,000,000 a year. This should average about a dollar a ton, showing a loss of a quarter of a million dollars a year from waste in the coal mining industry alone. West Virginia bears its full proportion of this loss and being second among the states in coal production with as great a proportion of waste as any of the states the waste in that state must be high up in the millions of dollars a year.

"In one respect at least," says Director J. A. Holmes, of the Bureau of Mines, in his annual report, just made public, "the consideration of mineral waste has a basis quite different from the consideration of agricultural waste. Our crops represent an annual production from a reasonably permanent soil; our forests may grow again, though a much longer period of time is required; and the soils themselves may be reproduced from the subsoil and the rock beneath. But of our mineral resources we have only the one supply. This supply is to a considerable extent destroyed in use; and at the present increasing rate at which we are using and wasting it our resources will either be exhausted or largely depleted while the nation is yet in its youth. The most urgent need for investigation and reform is in connection with the unnecessary waste of oil and natural gas that still prevails in many parts of the country. A few years of further delay and the valuable source of national wealth will have been wasted—permanently lost. The individual operators in causing this waste have followed their natural bent for temporary gain. The states have permitted this criminal waste without protest, fearing that interference might retard development. Will the national government do the same? Or the total waste of gas in the different oil fields of the country more than eighty per cent is believed to be easily preventable. As regards the remaining twenty per cent it is believed that gasoline may be extracted from much of the gas and the gas itself burned for some useful purpose, and thus the waste is still further reduced. The need for enlarged investigation is further shown by the fact that in addition to this waste of gas, the waste of petroleum, and especially the loss of the lighter oils in the pumping and storage of petroleum, is much greater than is ordinarily supposed. Moreover the injury caused by the flooding of oil and gas strata by underground water is another phase of the subject calling urgently for inquiry and investigation. The waste or loss from this causes a real menace to the value of our oil fields.

"The waste in coal mining is another drain on our national wealth which calls for serious and extended inquiry and investigation. A preliminary estimate, based upon limited inquiry and examination, indicates an annual waste or loss of coal in mining and handling of not less than 250,000,000 tons per annum. This represents a loss from our best and most easily mined coal of the nearest our great centers of industry. What is needed in connection with this loss is a thorough underground survey and examination of certain carefully selected areas in each of the important coal fields of the country, with a view to determining the exact conditions under which mining operations take place and the possibilities of adopting less wasteful methods. With this amount of accurate information before the public, it will then be possible to obtain the adoption of far less wasteful methods of mining. The results of such an investigation would also contribute largely to greater safety in coal mining; for problems are too intimately associated to permit separate treatment."

Regarding the loss of life in mining accidents, Director Holmes said: "If the increasing rate of coal mine fatalities during 1905, 1906 and 1907, the three years prior to the beginning of this work, had continued throughout the four subsequent years, since Congress began these mine-explosion investigations, the number of fatalities would have been at least 4,000 more than they have actually been." The report states that 30,000 men have been killed during the last ten years in the mines of the United States and that for every fatal accident there are from three to five serious non-fatal accidents and twelve lesser accidents which incapacitate for one or more days.

The report deals exhaustively with the work of the bureau in reducing the number and effect of mine explosions and of mine accidents generally; the extent and results of the mine rescue work; the reduction of the waste of mineral resources; the lessening of danger from the use of electricity in mines; the improvement in mine explosives and the lessening of danger from their use; the study and application of the results of the study of mine dust and gases; the stimulation of privately owned mine rescue stations; the improvement of safety lamps and the decrease in the danger of using lamps

in mines; the laboratory work of the bureau and many other matters of general interest to mine owners and operators.

Apparently from the reading of the report much has been done by the bureau of mines to lessen the danger to human life in the mining business, to conserve the natural resources of the nation and to benefit the mine operator as well as the operative.

IN ALL OUR NEIGHBORHOOD

There Is Hardly A Woman
Who Does Not Rely Upon
Lydia E. Pinkham's Vegetable Compound.

Princeton, Ill.—"I had inflammation, hard headaches in the back of my neck and a weakness all caused by female trouble, and I took Lydia E. Pinkham's Vegetable Compound with such excellent results that I am now feeling fine. I recommend the Compound and praise it to all. I shall be glad to have you publish my letter. There is scarcely a neighbor around me who does not use your medicine."—Mrs. J. F. JOHNSON, R. No. 4, Box 30, Princeton, Illinois.

Experience of a Nurse.
Poland, N.Y.—"In my experience as a nurse I certainly think Lydia E. Pinkham's Vegetable Compound is a great medicine. I wish all women with female troubles would take it. I took it when passing through the Change of Life with great results and I always recommend the Compound to all my patients if I know of their condition in time. I will gladly do all I can to help others to know of this great medicine."—Mrs. HORACE NEWMAN, Poland, Herkimer Co., N. Y.

If you are ill do not drag along until an operation is necessary, but at once take Lydia E. Pinkham's Vegetable Compound.
If you want special advice write Lydia E. Pinkham Medicine Co., (confidential) Lynn, Mass.

The Joy Of Coming Motherhood

A Wonderful Remedy That is a Natural Aid and Relieves the Tension.

Mother's Friend, a famous external remedy, is the only one known that is able to reach all the different parts involved. It

is a penetrating application after the formula of a noted family doctor, and lubricates every muscle, nerve, tissue or tendon affected. It goes directly to the strained portions and gently but surely relieves all tendency to soreness or strain.

By its daily use there will be no pain, no distress, no nausea, no danger of laboration or other accident, and the period will be one of supreme comfort and joyful anticipation. To all young women Mother's Friend is one of the greatest of all helpful influences, for it robs childbirth of all its agonies and dangers, dispels all the doubt and dread, all sense of fear, and thus enables the mind and body to await the greatest event in a woman's life with untrammelled gladness.

Mother's Friend is a most cherished remedy in thousands of homes and is of such peculiar merit and value as to make it essentially one to be recommended by all women.

You will find it on sale at all drug stores at \$1.00 a bottle, or the druggist will gladly get it for you if you insist upon it. Mother's Friend is prepared only by the Braxton Regulator Co., 137 Lamar Bldg., Atlanta, Ga., who will send you by mail, sealed, a very instructive book to expectant mothers. Write for it today.

Dangers of a Cold.
Do you know that of all the minor ailments colds are by far the most dangerous? It is not the colds themselves that you need to fear, but the serious diseases that they so often lead to. For that reason every cold should be gotten rid of with the least possible delay. To accomplish this you will find Chamberlain's Cough Remedy of great help to you. It loosens a cold, relieves the lungs, aids expectation and enables the system to throw off the cold. For sale by all dealers.—Advertisement.

CONCERNING CANCER
